

Etan Joseph Heyman

Full Stack Engineer/Front End Developer • Rehovot, Israel

+972 54 7589755 • etan@heyman.net

github.com/etanhey • [linkedin.com/in/etanheyman](https://www.linkedin.com/in/etanheyman)

Full-stack developer with 3+ years building production applications, specializing in frontend work across React, React Native, Svelte and Next.js. Strong eye for design patterns and visual details, but comfortable working across the entire stack. I adapt quickly to new technologies and thrive in fast-moving startup environments where shipping fast matters.

Work Experience

Software Engineer • Cantaloupe AI - New Orleans, LA/Denver, CO

08/2024 - Present

Front-end focused full-stack developer who's been building Cantaloupe AI's hiring platform from the ground up, working across React Native, Svelte, Bubble.io and Next.js as the startup evolved. Joined when it was just an early mockup, helped create the MVP and progressed to create a working platform that connects hospitality and construction candidates with employers through AI-powered interviews.

- **AI Voice Interviews:** Implemented Vapi.ai integration for automated candidate screening, reducing manual work by 80%
- **Full-Stack Contributions:** Designed database schemas, built real-time features and created responsive dashboards
- **Third-Party Integrations:** Connected Merge.dev ATS/HRIS systems, Google Maps APIs, Twilio messaging and a bilingual Spanish/English front end using i18n

Full Stack Developer & Project Lead • Weby - Remote - Israel

11/2023 - 08/2024

Developed a front-end in a team, as a full-stack developer alone, and as a team leader for a group of full-stack developers in a company founded and run by graduates of the college I attended. Developed primarily using Next.js, Tailwind CSS, Cloudinary, and Mongoose.

- Developed a CMS system for a photographer according to Figma designs using Cloudinary.
- Developed two personal trainer landing pages, one of which has an idle timer that prompts the user to schedule an appointment.
- Currently developing an online candle store, enabling customers to send organized orders via a bot through WhatsApp.

Front End Developer • JAMNext - Remote - California

12/2022 - 06/2023

Developed as part of a team of 3 junior developers, using Next.js, Redux, dnd-kit and .Net lambda for the backend.

- Developed the job tracker, a drag and drop board for applicants and recruiters to track their job applications and applicants.

Education & Training

Full Stack Developer • INT College Tel-Aviv, Israel

10/2021 - 10/2022

Leading online institute for professional training in Israeli high-tech industry. Learned to build full-stack applications, developing client-side interfaces and server-side systems with databases and APIs. Capstone: Collaborated in a 20-student team with 2 UX/UI designers to build a web application for Gold Ventures Investment firm connecting entrepreneurs with mentors and investors. Technologies: HTML5, CSS, TypeScript, React.js, NodeJs, MongoDB, MySQL, REST APIs, Cloudinary, Socket.io
